## ❖ Development of Bird watching skill

Birds play many important roles to maintain the health of ecosystems through their actions as pollinators, seed dispersers, predators, scavengers, and as prey for other species. Wetland birds are an important component of wetland ecosystem, as they form vital links in the food webs. The India checklist acknowledges a total of 1317 species of birds for India and for Indian subcontinent 1392 constituting about 12% of the world avifauna. Students studying under-graduate courses, especially following Zoology course have to develop skill of bird watching in order to explore local diversity, their guild base, and abundance. Apart from academic interest, development of bird watching hobby is the key to the development of enriched personality. Practice – During academic session 2020-2021, certificate course for bird identification had been introduced. This academic session (2021-2022) also same course programme has been continued. Along-with the candidates pursuing the said programme, some of the regular students showing keen interest in the bird watching were regularly taken for the bird watching in campus as well as nearby wetlands. Now the students can easily identify common birds observed in the college campus and nearby wetlands like, Indian brown stone chat, paddyfield pipit, Silverbill Munia, Scaly Breasted Munia, House Sparrow, green bee-eater, red vented bulbul, laughing dove, aashy headed Prinia, Indian Roller, Common Myna, Purple Sunbird, etc. were regularly seen. On 5<sup>th</sup> October, 2021 Nature Trail to Ghodazari Forest, had been organized in collaboration with Zep Nisargmitra Sanstha, Nagbhid,
